

S No	Changes to be made
1	The "New Born" checkbox should be removed from the main bar and placed under Personal Details.
2	The Register Date should not be modifiable.
3	Redesign the UI for searching existing patients.
4	Mandatory details need to be highlighted.
5	Rename "Doctor Only" to "Doctor Consultation".
6	On new hospital registration, redirect to the Hospital Profile Setup flow.
7	Add a separate section called "Profile" and remove hospital-related profile sections from the current Profile section.
8	Registration fees should be modified in the Profile section.
9	Remove the pop-up in patient search.
10	Add the QWEW system in the Laboratory module.
11	Add a Notes section for recording vitals if vitals data are required while taking samples.
12	In Doctor Test Verification, rename the "Verify" button to "View".
13	All patient test result PDFs should be locked and use the patient registration number as the password.
14	Remove sample containers from the Laboratory section and move them to the Inventory section.
15	Add a feature under Settings to turn Auto PO Billing on and off.
16	In the Purchase Requisition table, also display the current available stock irrespective of batches.
17	Implement hierarchy-based roles (Purchase Officer and Purchase Head); confirm requirements with the on-field team.
18	In PO, the unit price should be picked from the pre-assigned rate.
19	Always use the last purchase price for billing the PO.
20	Hospital infrastructure should be under the Profile section.
21	Arrange the navbar sections in the correct order.
22	In the New Batch stock entry page, add a feature to create a new item and batch.
23	The Test Mapping section should be under the Laboratory module.
24	If test consumption is not created, that test should not be enabled.
